

We are happy to present a selection of works from our gallery's artists. We chose to unveil them progressively, following three distinct themes, until fourteen artists are shown on this platform. Each Thursday (the 4th and the 11th), more works and new artists will be revealed!

Our first selection brings together 5 international artists reflecting upon architecture and spatial construction. They play with perception, create theoretical and visual dialogues with architecture, or generate cocoon-like organic shapes. Works by José Pedro Croft, Fernanda Fragateiro, Panos Papadopoulos, Roeland Tweelinckx and Tatiana Wolska.

The 2nd series is characterised by interactions with history: artworks expressing temporal density, from personal memories to political archeology and including artistic conversations unfolding through time. Works by Lucile Bertrand, Rui Calçada Bastos, Gudny Rosa Ingimarsdottir, Eirene Efstathiou and Pedro A.H. Paixão.

The 3rd selection will present approaches that are going beyond painting. The artists explore different ways to extend or transcend painting; they shift its framework and interfere with the traditional divides between disciplines. Works by Gauthier Hubert, Athina Ioannou, Guillermo Mora and Bernard Villers."
