This project deals with contemporary drawing and the different visual and conceptual possibilities this medium can offer; with a gaze on the past and the work of artists, who made a remarkable use of it in history.

Austrian artist Fritz Panzer and Paris based Portuguese artist João Vilhena are the protagonists of this focus: their peculiar use of drawing - with conceptual shades, plays of words, pencil, *pierre noire*, wire, on cardboard, or occupying the space - is at the core of *Drawing - Dessin - Disegno*.
