Davide Balliano

January 19 – March 26, 2022

Cardi Gallery
Corso di Porta Nuova 38, Milano

Milan, December 21, 2021. Cardi Gallery is pleased to announce the first solo exhibition by Italian artist Davide Balliano. The exhibition will open to the public from January 19 to March 26, 2022 in Corso di Porta Nuova 38.

Through an important *corpus* of new and unpublished artworks produced in 2021, the exhibition offers a unique opportunity to discover the artist's visual language and to deepen his investigation regarding formal problems, in balance between the severity of geometry and the warmth and weight of human experience.

The systematic study of *movement* - understood as the commanding motion of nature, the unescapable rhythm of history - leads Balliano to produce the series *Untitled*, artworks in black and white on linen canvases. In these oeuvres Balliano ceases to work on wooden boards and begins to use linen canvas, a light material that allows the *texture* of the pictorial material to emerge as a primary element, meanwhile giving the artist the chance to work more freely than with the limits imposed from the wooden support.

The intense interaction of black and white is a fundamental element of Balliano's aesthetic, which does not reject color, but rather is constantly contemplating it. At a first glance his artworks appear precise, well-ordered and methodical, but on a closer examination the application of black comes to life with scratches and abrasions that transform the austere surface into a highly material work, with sculptural results, highlighting how the unceasing encroachment between painting and sculpture is a fundamental element in his research.

Davide Balliano

Davide Balliano (Turin, IT 1983) is an artist whose research operates on the thin line of demarcation between painting and sculpture. Utilizing an austere, minimal language of abstract geometries in strong dialogue with architecture, his work investigates existential themes such as the identity of man in the age of technology and his relationship with the sublime. Through a practice that is self-described as monastic, austere and concrete, Balliano's meticulous paintings appear, upon first glance, clean and precise. However, closer inspection reveals scrapes and scratches that uncover the organic wooden surface underneath the layers of paint, as a decaying façade of abandoned modernistic intentions. In addition to painting, Davide Balliano is also known for his sculptural work, which translates the visual vocabulary found in his paintings into solid objects, often in stainless steel or ceramic. Originally trained in photography,
