Music Swims Back to Me

March 6, 2024 - April 20, 2024

Music Swims Back to Me investigates a methodology of producing photographic images in the dark – blind, without seeing – in a process informed by cadavre exquis. These artistic forms expand from and build upon the history of photography. The resulting images have performative elements that weave together threads of Surrealist histories, photographic histories, feminist histories, poetry, and autobiography.
