Jimmy (ジミョー Jimmyō) is an 'experimental' Insect. He is actually a combination of several Parasites, whose shapeshifting ability has advanced to the point where they can switch positions, each forming a different limb as the situation requires. Jimmy is the most intelligent and skilled, and is the de facto leader of the composite body. Because his head and all of his limbs are made of Parasite cells, Jimmy is much faster, stronger, and more dangerous than standard Parasites, and nearly impossible to injure.
